

# LILY'S SWEET SAVINGS ADVENTURE

Once upon a time, there was a little girl named Lily who had a very important job.

She worked in a bakery and her job was to make delicious cakes and cookies for everyone to enjoy.

Lily loved her job and she worked very hard every day.

And do you know what happened?

Every week, Lily received something called a salary. A salary is money that you get paid for doing your job.

Lily's salary was enough to pay for her home and her food, but she also wanted to buy a new bike.

However, buying a new bike costs a lot of money, so Lily had to think of a plan.

She decided to put some of her extra money into a bank account.

A bank account is a special place where you can keep your money safe. And when you put money into a bank account, it's called a deposit.

Lily's bank account had two parts - a savings account and a checking account.

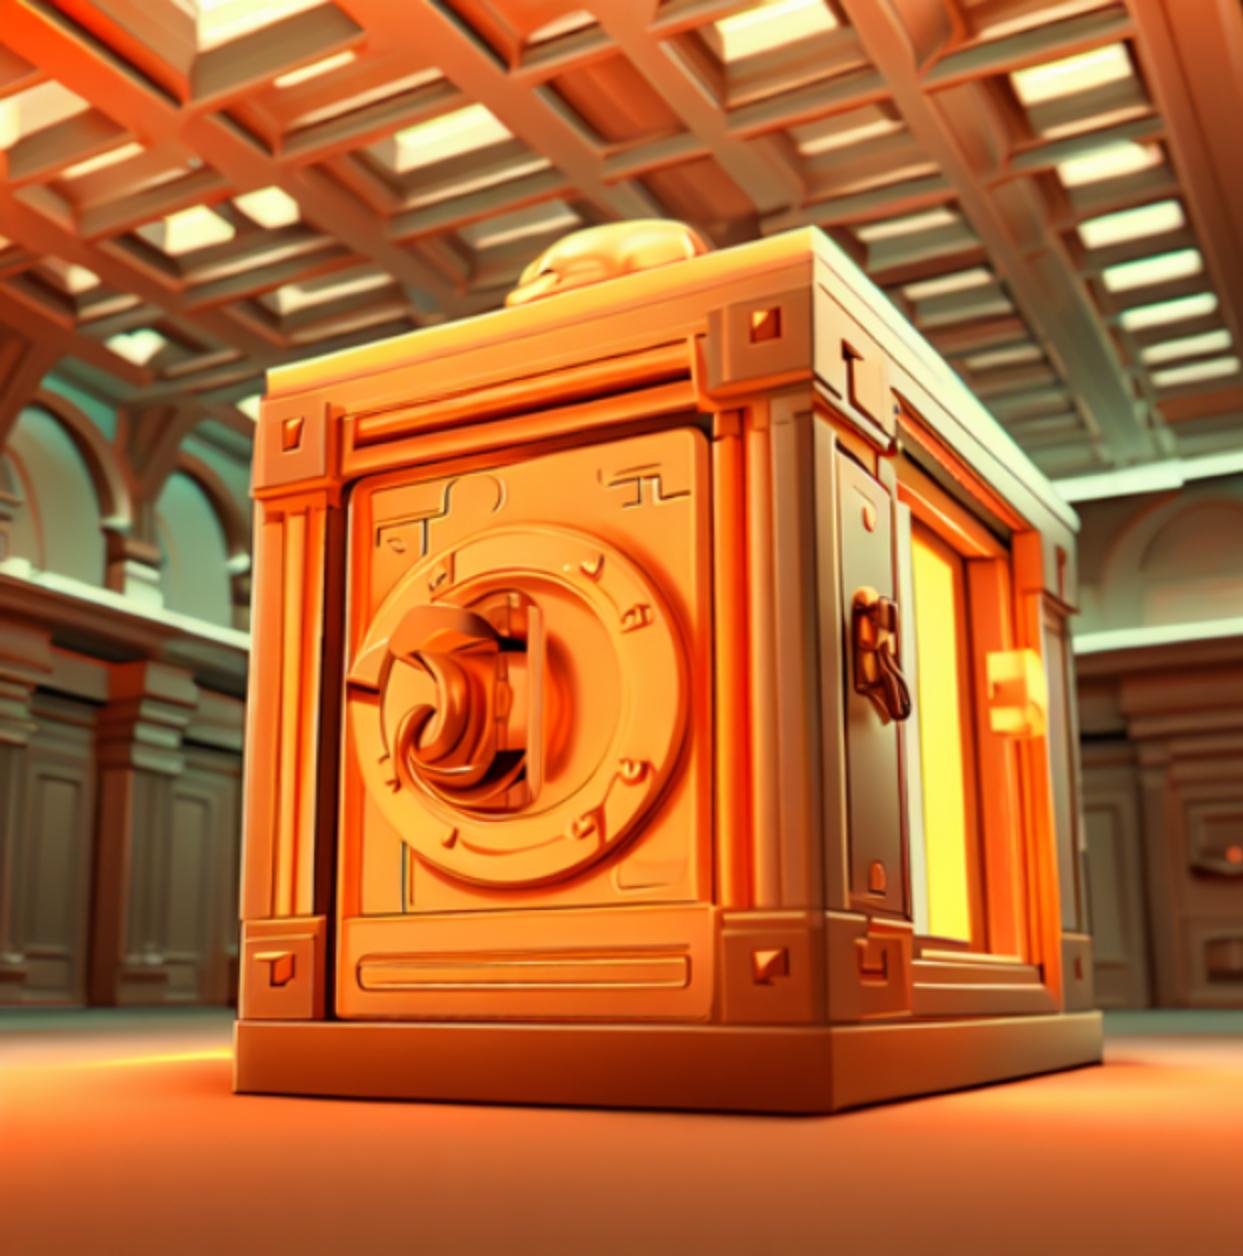

A savings account is where you can keep your money for a long time and it will earn you more money over time.

A checking account is where you can keep your money for everyday things, like buying food or toys.

Lily put her money into her savings account and she saved her money for a few months.

Finally, she had enough money to buy her new bike!

Lily learned that it's important to save your money for the things that you really want, like a new bike.

And it's important to be responsible with your money by putting it in a bank account.

So remember, just like Lily,  
it's important to be  
responsible with your  
money and to save for the  
things you really want!
